

Cumbria community defibrillator package

North West Ambulance NHS Trust and the Community Heartbeat Trust charity have teamed up to offer a resilient and standardised cPAD package for Cumbria.

Community defibrillation saves lives, but these are medical equipment and must adhere to the correct Governance and also liabilities. The Community Heartbeat Trust are the leading specialists in the provision of resilient community systems, that address not only the best suited equipment, but also Governance packages, Insurance, managed services, support, and also work with BT to use adopted telephone kiosks as defibrillator sites. CHT are the only organisation that has permission to access the unmetered supply of electricity in telephone kiosks, as well as provide emergency telecoms equipment to go with the defibrillators. CHT is also registered with the FCA and can act as an introducer for insurance services for the equipment.

The fully inclusive Cumbria package comprises of the following:

- Lifeline VIEW defibrillator (a defibrillator specifically designed for community use)
- Green Urban/CHT ShockBox Sentry defibrillator cabinet (IP65, heated, safe, DDA compliant)
- WebNos™ Governance system
- Policies and procedure documentation
- Installation of the cabinet to the kiosk (meeting BT regulations)
- Ambulance service registration
- Accreditation scheme
- Community awareness programmes (deliverable via local CFR groups if required)
- Data download service post rescue
- Counselling services post rescue
- Posters for village
- Renovation paint for the kiosk (K6 red kiosk only)

Optional extras:

- 999 emergency telephone for the adopted kiosk, or other locations
- Annual support and maintenance agreements
- Village Emergency Telephone System (VETS) for lone rescuer situations
- Community first aid programmes
- Equipment insurance (theft and damage)
- GPS tracking service for the defibrillator
- CHT CARS community training programme
- CHT managed programme (full service and support, inc insurance)

Projects can be done on a 'sale' basis, which will become liable for VAT, or a 'Managed Solution' basis, with CHT providing the entire service to the community. PLI and other insurances are included in a managed programme, representing a considerable saving over 10 years.

The base price for the Cumbria cPAD package is **£1950** (plus VAT if applicable) *inc* installation and training (or **£1850** without CHT supplied training).

All guide prices exclude VAT and delivery

Currently some 300 kiosks are under adoption for this project, a process that normally takes 90-120 days. Around 150 are now available to be used.

The package is also applicable to village halls and other locations.

For more information please contact the Charity via our web site, or call 0845 86 27739 (option 1).

The leading community defibrillator charity

Cumbria community defibrillator package

Features of the service:

Lifeline VIEW defibrillator – the only defibrillator specifically designed for community use. It is DDA compliant, and has audible and visual instructions, the latter by a small TV on the defibrillator. The unit is very small and light, weighing only 1.4Kg, and comes with a carry case and rescue kit. Easily supported in situ. Currently the fastest growing make in the UK. Warranty of 10 years if through a CHT Managed Solution service.

GU/CHT Sentry cabinet – designed specifically for the VIEW (but suitable for other makes too) the ShockBox Sentry cabinet is IP65 certified, meets DDA compliance and is electrically safe. Can be provided locked or unlocked, and is made from stainless steel to meet the Cumbrian weather.

WebNos Governance system – is the only on-line fully comprehensive defibrillator Governance system, It allows for a full provenance of the equipment, defibrillator and cabinet, to be tracked and weekly/monthly/annual checks recorded. It will generate reports for the coroner in case of a death, and the data is viewable by your ambulance service allowing them to meet CQC requirements. WebNos also stores the necessary policies and procedures you require for complete Governance.

Support contracts – covering all replacement electrodes, batteries, data downloading post rescue, rescue kits, replacement defibrillator if yours is out of action, annual service check, counselling, regular newsletters. Includes theft and damage insurances – from £126 per annum.

Insurance services – theft and damage insurance via Sterling Insurance up to £2000. This covers not only the defibrillator, but also the cabinet, and covers for when the kit is out on a rescue as well. PI available as well.

VETS™ service – in a lone rescuer situation (>33% of cases) the rescuer will be told to stay with the patient. In these situations the community can have rescue volunteers or runners who can go and fetch the defibrillator and also help with CPR. These volunteers are linked via the VETS system, whereby a single telephone numbers rings all 10 volunteers. The system can be supported by the VETSfone™ mobile telephone system. Free for first year.

999 emergency telephone – where adopted kiosks have had the telephony equipment removed, CHT can provide a 999 emergency telephone system for the village, either in the kiosk or adjacent to the defibrillator. Available to any cPAD site.

Counselling services – after a rescue you may like to talk through the experience with someone on a confidential basis, or you may be suffering PTSD. In these instances, CHT offer the community a telephone counselling service that is free, confidential, and designed for the task.
